Users & Staff

EDIT

User Management

- Roles
- Permissions

Accessible by: Directors

The Users & Staff page is an easy way to manage the users of your hackathon's HackathonManager instance. In addition to attendees, you can also manage volunteers, organizers and directors.

User Management

Certain attributes within a user can be modified.

- Email:** The email for the user, used for signing into HackathonManager.
- Role:** Role for the user, see [Roles](#).
- Login access:** Allow/Block login for that specific user. Will also disable the weekly report email if that user is an admin.
- Receive weekly report:** A weekly email report on admissions, bus lists, and messages. Only sent when there are weekly updates up until 7 days past the event.

Roles

Roles allow for organization and permission access for users. There are four roles within HackathonManager: **User**, **Volunteer**, **Organizer** and **Director** with Director being the highest.

Permissions

The following are permissions for all admin roles. An admin role is any role other than User that has access to the admin dashboard. User can only create, view, edit and delete their own questionnaire.

	Volunteer	Organizer	Director
